

COMMERCIAL PUMPER

Up to 10 cu. ft. of additional compartment storage allows for multiple compartment configurations.

Optional drop-down or overhead ladder storage places ladders and equipment easily accessible at ground level.

COMMERCIAL PUMPER

When your department needs an apparatus and the budget is limited, the E-ONE Tradition Commercial Pumper is the unit that fits the bill.

The E-ONE Tradition Commercial Pumper is available on a two- or four-door chassis, optional seating for up to six personnel and offers an extended front bumper for hose and preconnect storage.

The body is designed with flexible ladder and equipment storage options, up to twelve body compartment configurations and side- or top-mount pump panel operations. This body puts the equipment where you need it.

The E-ONE Tradition Commercial Pumper is practical, easily adaptable and, above all, economical.

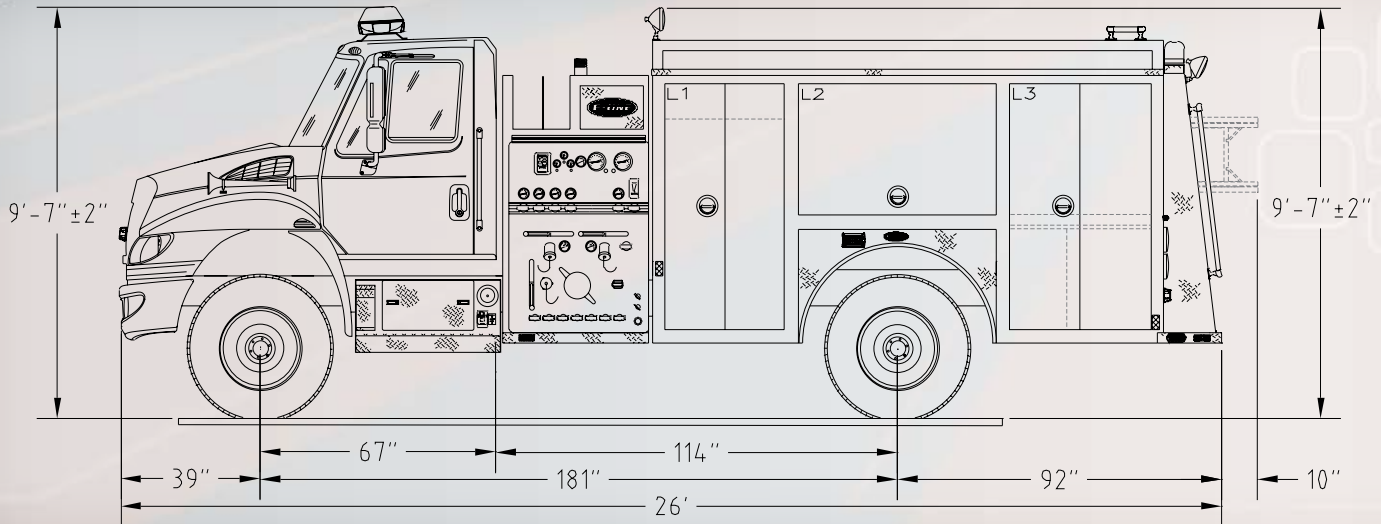

- Commercial Chassis
- Hale® pump (1250 or 1500)
- 89- or 129-cu. ft. of NFPA hosebed storage
- Three officer-side ladder / equipment storage options
- Side-mount or top-mount pump panel
- Spacious body compartments for storage of NFPA equipment
- Optional extended enhanced body provides increased cu. ft. of storage
- 750- or 1000-gal water tanks

* Specifications subject to change without notice or obligation. Options vary by dealer. E-ONE is ISO 9001:2000 compliant.

* Engines are subject to availability

A corrosion-resistant polypropylene tank is the best choice for long life and features a lifetime warranty. They are cradled in a floating mount system to reduce tank stress and extend service life. Integral single and dual foam cells are popular options.

The knurled edge of our rub rails reduces the chance of injury by providing a slip-resistant stepping surface in addition to our Gator Grip™ step areas.

Rear compartments are transverse for increased overall access and storage.
