TRADITION ES PUMPERS

PERFORMANCE. SAFETY. AFFORDABILITY.

E-ONE Tradition ES pumpers are designed to meet the needs of today's firefighters while maintaining superior quality and offering a short delivery time.

Tradition ES pumpers offer various pump operator positions, multiple compartment sizes and several ladder storage configurations. All models are NFPA compliant and available on a commercial or E-ONE custom chassis.

Fully engineered and tested to strict certification standards, Tradition ES pumpers are durable, NFPA compliant, and feature E-ONE's standard interlocking aluminum extrusions and plating to endure the rigors of emergency response for years of faithful service.

- Custom or commercial chassis
- Hale® pump with optional foam system
- 89 cu. ft. of hosebed storage
- Three officer side compartment and ladder storage configurations
- Side-mount or top-mount pump panel
- Spacious body compartments for tool and equipment storage
